**Physical State:** Liquid.

**CAS #:** 8023-95-8

**Impurities:** None.

**Trade Secret Claim:** None.

### Section 4. First Aid Measures

**Eyes:** Rinse eyes immediately with running water at low pressure. Consult an ophthalmologist.

**Skin Contact:** Take off immediately all contaminated clothing. Wash skin thoroughly with soap and warm water for several minutes. Get medical attention if irritation develops and persists.

**Inhalation:** Supply fresh air and contact a doctor. In case of unconsciousness, place patient stably in side position for transportation.

**Ingestion in excess:** Call a physician or poison control center immediately. If swallowed, rinse mouth with water (only if the person is conscious). Do not induce vomiting. If vomiting occurs, the head should be kept low so that stomach vomit doesn't enter the lungs.

**Emergency Care:** Contact local emergency provider. For non-emergency, contact primary care provider. Most important symptoms and effects, both acute and delayed. May produce an allergic reaction. Treat according to symptoms.

**PPE:** Gloves, lab coat or uniform, safety glasses, eyewash, safety shower.

**Special Fire-Fighting Procedure:** Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Structural firefighter's protective clothing will only provide limited protection. Wear self-contained breathing apparatus with a full face piece operated in the positive pressure demand mode when fighting fires.

**Unusual Fire and Explosion Hazards:** Vapor may travel to source of ignition and flash back. Vapor may settle low or in confined spaces. May produce a floating fire hazard. Static ignition hazard can result from handling and use. Essential and vegetable oils have the potential to self-heat and contribute to spontaneous combustion when present on fabrics. Caution should be exercised in the storage and launder of fabrics exposed to oils. Carbon oxides are produced when burning.

**PPE and Precautions for Firefighters:** Static charges generated by emptying package in or near flammable vapor may cause flash fire. Use water spray to cool unopened containers. Do not allow contaminated extinguishing water to enter the soil, ground-water or surface waters.

## Section 6. Accidental Release Measures

**Personal Precautions:** Keep unnecessary personnel away. Eliminate all sources of ignition. Avoid contact with skin or inhalation of spillage, dust or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them.

**Environmental Precautions:** Prevent further leakage or spillage if safe to do so. Do not contaminate water. Avoid release to the environment. Retain and dispose of contaminated wash water. Contact local authorities in case of spillage to drain/aquatic environment.

**Containment:** Absorb with clay, sand, or other non-combustible material. Prevent entry into waterways, sewers, and confined areas.

**Clean Up:** Eliminate all ignition sources (no smoking, flares, sparks or flames in immediate area). Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with inert absorbent such as dry clay, sand or diatomaceous earth, commercial sorbents, or recover using pumps. The product is immiscible with water and will spread on the water surface. If the spill is small, wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. Never return
