Section 5. Fire-Fighting Measures

| | |
|--|---|
| Flammability: | Flammable. |
| Extinguishing Media: | SUITABLE: Fog, CO ₂ , dry chemical, or aqueous extinguishing media. NON SUITABLE: Water. |
| Special Fire-Fighting Procedure: | Carbon oxides are produced when burning. Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. Structural firefighter's protective clothing will only provide limited protection. Wear self-contained breathing apparatus with a full face piece operated in the positive pressure demand mode when fighting fires. Cool undamaged containers or piping with water. Do not allow contaminated extinguishing water to enter the soil, ground-water or surface waters. |
| Unusual Fire and Explosion Hazards: | Vapor may travel to source of ignition and flash back. Vapor may settle low or in confined spaces. May produce a floating fire hazard. Static ignition hazard can result from handling and use. Essential and vegetable oils have the potential to self-heat and contribute to spontaneous combustion when present on fabrics. Caution should be exercised in the storage and launder of fabrics exposed to oils. |
| PPE and Precautions for Firefighters: | Static charges generated by emptying package in or near flammable vapor may cause flash fire. Use water spray to cool unopened containers. |

Section 6. Accidental Release Measures

| | |
|-----------------------------------|---|
| Personal Precautions: | Ensure adequate ventilation/exhaust extraction. Wear personal protective equipment. Avoid contact with skin and inhalation of it vapors or smoke. |
| Environmental Precautions: | Do not discharge directly into drains or soil. Keep away from surface and ground water. Do not flush into surface water or sanitary sewer system. |
| Containment: | Terminate and take up spills with absorbent material (sand, kieselguhr, universal binder, etc.) or with pumping. |

Provide good ventilation of working area (local exhaust ventilation if necessary). Avoid formation of aerosols. Smoking, eating and drinking should be prohibited in application area. Avoid contact with skin and eyes. Handle in accordance with good industrial hygiene and safety practice.

Storage Precautions: Keep container tightly closed, protected from light and potential sources of ignition. Store separated from foodstuffs or animal food. Store in a cool and well-ventilated place. Recommended storage conditions 18-25°C (65 - 77°C)

Other: See Section 8

Section 8. Exposure Controls/Personal Protection

Engineering Controls: Exhaust ventilation or other engineering controls to keep vapor concentration below their respective threshold limit value. Ensure eyewash stations and safety showers are proximal to the work station. Use explosion-proof ventilation equipment to stay below exposure limits.

Respiratory Protection: In case of any possible exposure, wear gasmask with fresh air supply.

Hand Protection: Chemical resistant gloves.

Eye Protection: Safety glasses with side protection shield.

Skin and Body Protection: Closed working suit.
